

With over a million videos, texts and selfies
a minute blazing through here,
Bard's keeping it all cool.

With demanding high internal heat loads, you need cooling technology specifically-designed for the unique demands of equipment shelters, telecom and data centers. Reliable, durable and efficient, Bard's Free-Flow™ Economizer can provide free cooling operation for over 50% of the run-time. And with Bard's renowned build quality, you know it can handle the heat.

Always innovating, Bard is ahead of the curve with the latest industry science, code updates and efficiency requirements. That's how we develop the hottest technologies to keep yours cool. And have been for over a century.

Breathe easy. You've got Bard.
