## Wall-Mounts to Meet Changing Standards.

As federal and state regulations concerning Energy Efficiency Ratings (EER) for HVAC continue to change, Bard makes it easy by offering a full line of wall-mount units. Bard has 9 and 10 EER air conditioning and heat pumps available, along with 11 EER heat pumps. So, regardless of where your state regulations land, you know you're covered.

No matter what industry you're in, you can trust Bard. After all, we make more wall-mounts than any other company in the world. We're also recognized for the quality, durability and reliability of our units. As a leader in innovation, our smart, versatile wall-mount units come with a long list of smart features and unparalleled advantages that keep Bard ahead of the competition – in any industry.

### SCHOOLS

Bard's wall-mount units provide individual classroom control for a higher-degree of comfort, high energy efficiency and easy installation compared to expensive, traditional HVAC systems. That's what makes Bard Classroom Preferred for schools.

Bard's wall-mount heat pump is a self-contained energy efficient heating and cooling system designed to offer maximum indoor air comfort at a minimal cost. Our wall-mount options are an ideal product for new school construction, school modernization or modular school buildings.

- Optional Full Flow Economizer – allows you to pull in 100% of outside air when the temperature is right. Many schools now mandate this feature.
- Easy to install and control, whether renovation or new build
- Technicians prefer ease of working on Bard wall-mount units
- Quiet operation makes Bard ideal for schools

### EQUIPMENT SHELTERS

It's vital to keep expensive equipment in shelters cool, so HVAC dependability is extremely important. Bard's wall-mount units deliver rugged durability, unmatched dependability, smart innovation and quiet operation.

- Bard develops specialty equipment and upgrades for telecom carriers to meet specific needs
- Only Bard delivers instant online training and certification
- Easy serviceability
- Updated wiring
- The equipment shelter industry's first self-addressing unit – instant addressing upon installation

### MODULAR BUILDINGS

The name Bard is practically synonymous with modular. Our wall-mount units are specifically designed for modular buildings, providing exceptional Indoor Air Comfort combined with rugged dependability and easy serviceability no one else can match. That's why for more than 50 years, Bard has been the preferred choice for modular buildings of all types.

- Multiple options available to heighten Indoor Air Comfort
- Options for humidity control, fresh air ventilation and sound reduction
- Shake tested to withstand transport without damage
- Easy maintenance and serviceability

## *The Smartest and Most Versatile Wall-Mounts on the Market.*

### **FLEXIBILITY**

Bard is all about options. Our units come with EERs of 9 and 10 for AC and heat pumps, plus 11 EER heat pumps. We manufacture both interior and exterior wall-mount units. And, our patented ventilation options meet a wide range of specified ventilation requirements, which can be factory installed or easily added in the field. Most units also have innovative options to meet your specific needs for schools, modular and light industrial buildings, equipment shelters and more. Whatever you need, wherever you are, Bard has you covered.

### **DURABILITY & RELIABILITY**

Bard's wall-mount units are tough and made to last in even the harshest conditions – severe weather, extreme temperatures, wind and moisture. Once you install a Bard unit, you can trust it to work – time and time again. Our simplified design provides stable, reliable service and makes maintenance and service simple.

Bard units are known for their reliability, but if there is ever a problem, we provide outstanding local support and service from Bard distributors. Plus, Bard's warranties are among the most generous in the industry, so there's no reason to worry – we've got you covered.

### **SMART OPTIONS**

Rugged, durable, reliable. Those are words that may pop into your mind when you think Bard. Our units are smart, too. Our simple design makes them easy to install, operate and maintain. They come with a long list of options for sound levels, humidity, ventilation and more. But whatever options you need for your specific application, there are no worries because Bard has you covered.

#### **ENERGY EFFICIENCY RATINGS (EER)**

- 9 and 10 EER AC and HPs, and 11 EER HP units available

#### **SOUND REDUCTION OPTIONS**

- Isolation, sound or acoustical curbs
- Acoustical accessories
- WISP series sound plenum

#### **AIR FLOW OPTIONS**

- Programmable units available
- Multi-speed settings available

#### **UPDATED VENT OPTIONS**

- Plug and play capability – available on some units
- Optional full flow economizer – allows you to pull in 100% of outside air when the temperature is right
- Energy recovery ventilator
- Barometric or motorized fresh air damper assembly

#### **HUMIDITY CONTROL OPTIONS**

- Active dehumidification circuits
- Independent heat exchanger coils
- Dehumidification valve
- Independent humidistat
- Energy recovery ventilator

## VARIETY

Bard wall-mounts come in a variety of colors and are designed to virtually disappear into the environment.

**X = BEIGE**

**1 = WHITE**
