

Bard Model QLS2 & 4

Bard 1" Deep Q-TEC™ Service Louver

SUSTAINABLE EXTRUDED ALUMINUM

Dimensions are in inches

An attractive mechanical air louver with a removable service core that utilizes our exclusive shading "C" blade.

DESCRIPTION:

QLS 2 & 4: This model offers the economical louver design of the 1" depth combined with the strength of our "C" blade for an attractive mechanical louver with shaded line-of-sight. The core of the louver is removable for easy service access. Constructed of sustainable aluminum with 6063-T5 mill finish and a baked enamel finish. The QLS will enhance design while assuring the Q-TECs performance ratings.

Features Include:

- Bard's engineering lab design and testing assures the rated ventilation and efficiency performance of the Q-TEC product.
- Our exclusive "C" blade design offers strength and sight-shading for a clean appearance.
- The louver is flange framed and 1" deep.
- The core of the louver is easily removable to gain service access.
- The "C" blade .040" extrusions coupled with mechanical bonding offer a louver that is stronger than most 1" louvers.
